PROFESSIONAL SUMMARY

Motivated Electronics and Communication Engineering student with strong skills in circuit analysis, programming, and problem-solving. Part of Eagle's Eye, a startup focused on innovative educational and tech solutions. Experienced in graphic design, Photoshop, and web development, with a passion for creating visually engaging and functional designs. Highly adaptable, compassionate, and driven to combine technical expertise with creativity to build impactful solutions. Aspiring to grow as a professional in engineering and freelance design while contributing to long-term personal and financial goals.

PROJECTS

TRACKUP:

Smart Educational Roadmap is a modern, AI-powered platform that helps students organize their academic journey and shape their career path. With a clean and futuristic design, TrackUp allows users to register, manage their academic details, and access personalized study and career roadmaps based on their branch or department. Whether you're in CSE, Mechanical, Civil, or any other field, TrackUp suggests the right skills, courses, and technologies to focus on—making learning structured and goal-oriented.

TOURISTO:

Touristo is a web-based travel platform designed to help users explore destinations, plan trips, and discover unique experiences. It offers insights into popular tourist spots, local attractions, travel tips, and personalized recommendations. Whether you're looking for adventure, culture, or relaxation, Touristo makes travel planning easier and more enjoyable.
